HOW MUCH GROUND DOES EACH STUDENT GET?

NSW government schools in inner Sydney and Parramatta. Grounds per student from the shapes made in Plotlay, for the year picked (2025 when none is).

Year

2025

m² of grounds per student, year picked

Median m² per student, all compared schools

30.7

Median m² per student, high schools

34.7

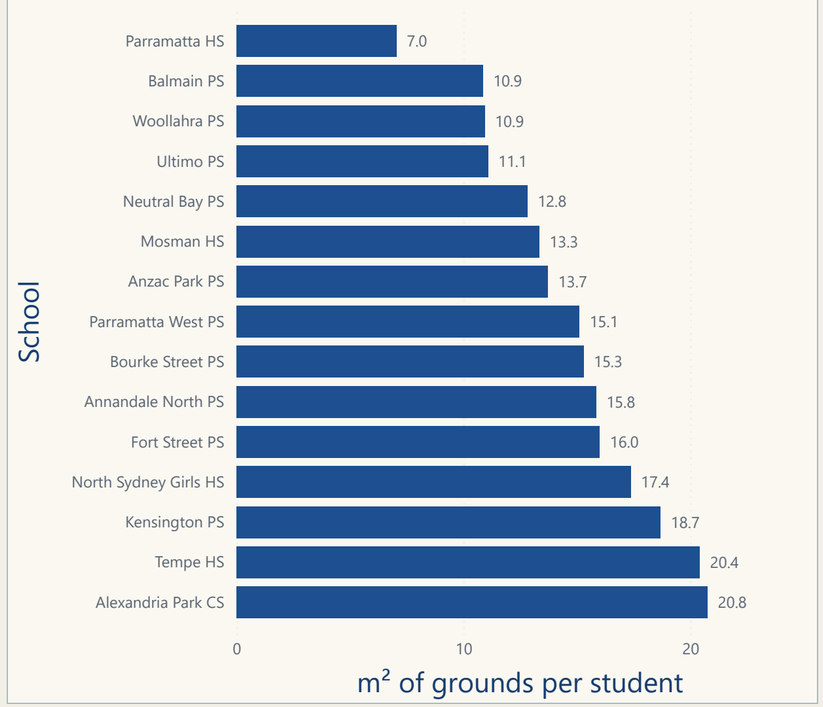

Students in the study area

41K

Median m² per student, primary schools

30.3

The 15 compared schools with the least ground per student

School data: NSW Department of Education, data.nsw.gov.au (CC BY). Cadastre and imagery: © State of New South Wales (Spatial Services), CC BY 3.0 AU. School outlines made in Plotlay (getplotlay.com) from NSW Cadastre lots and drawn over NSW Imagery. Suburbs on the map: ABS ASGS 2021 (CC BY 4.0). Grounds are land including buildings, not floor or playground area. Areas approximate.

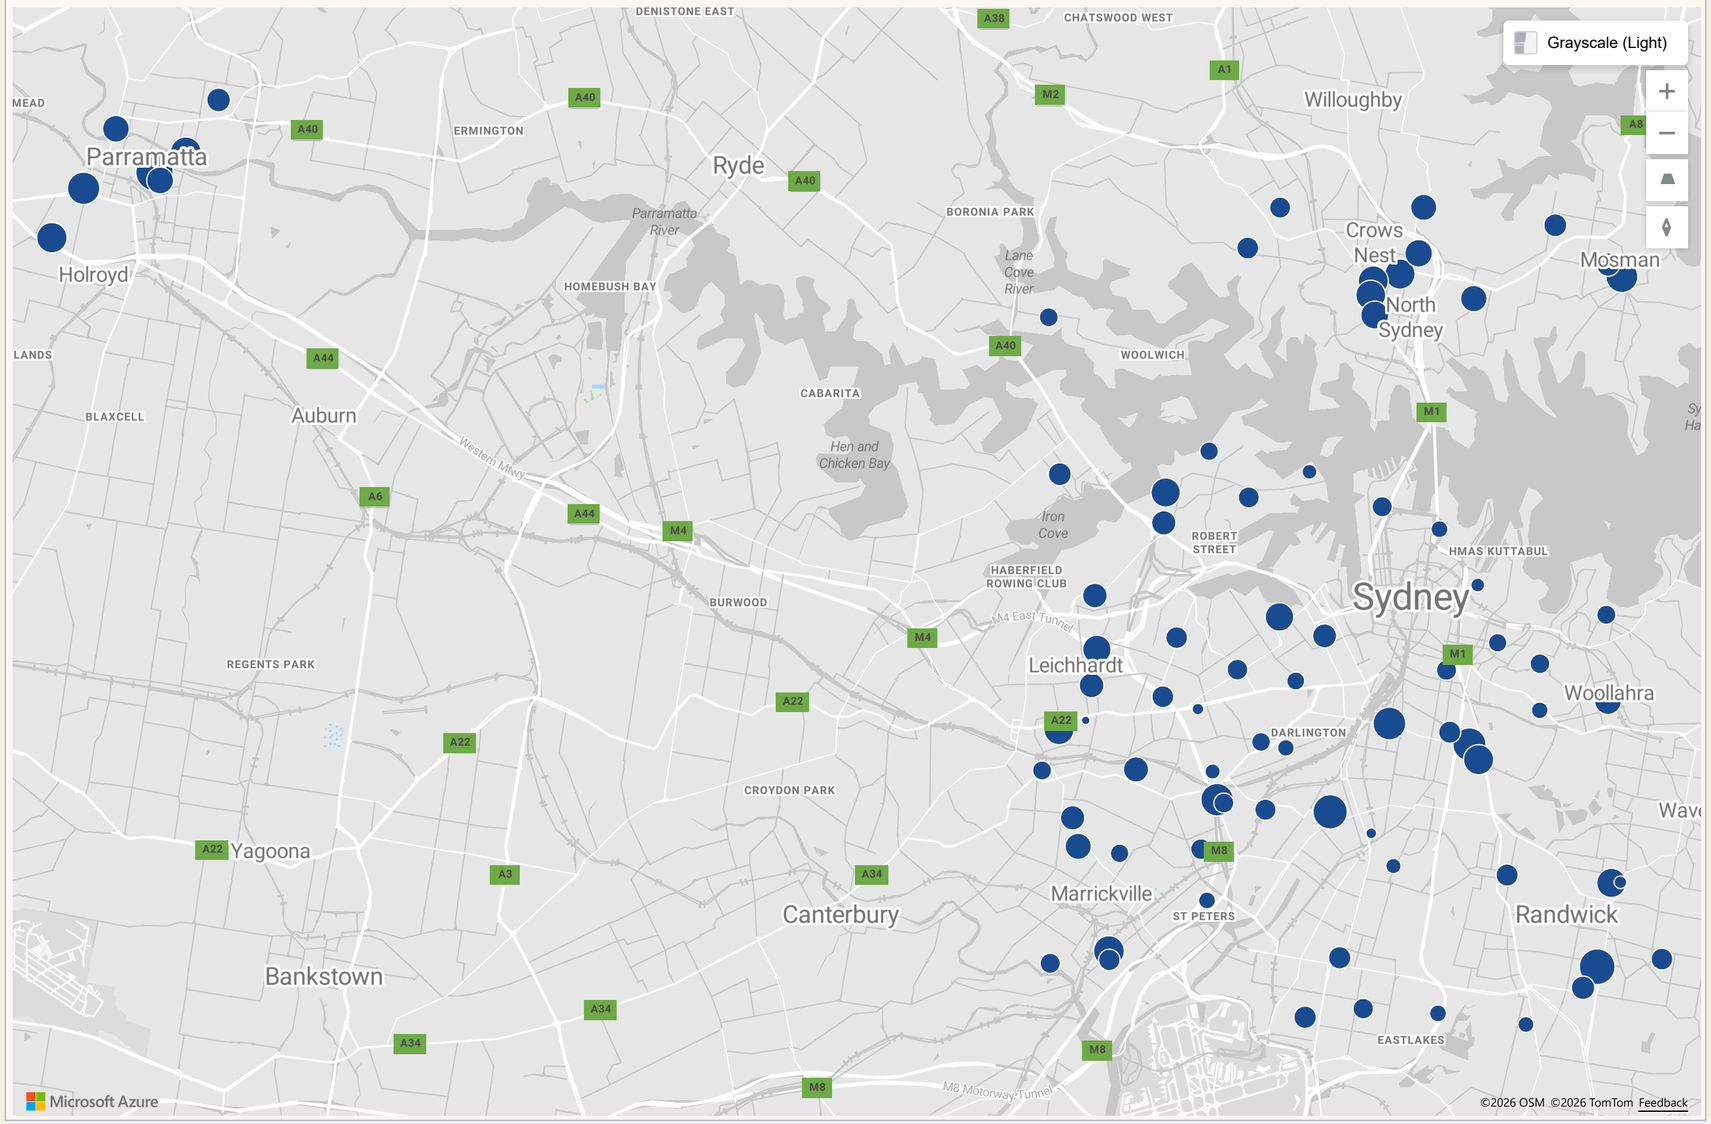

WHERE THE TIGHT SCHOOLS ARE

Azure Maps: add the reference layer data/geometry/schools.geojson (Format visual, Reference layer) for the filled shapes; it joins on the school code.

Grounds are land including buildings, not floor or playground area. Areas approximate.

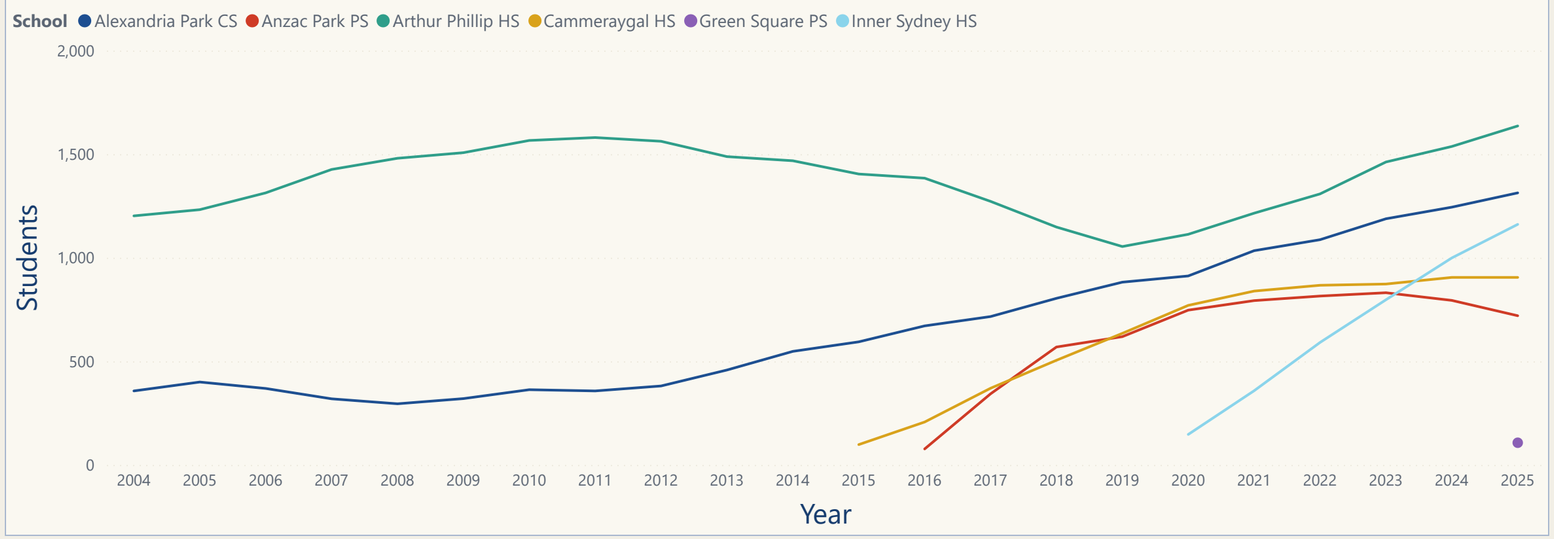

NEW SCHOOLS OPEN A YEAR GROUP AT A TIME

Headcount 2004 to 2025. New schools climb as planned year groups are added (Inner Sydney High: Year 7 in 2020, Years 7 to 12 in 2025), not from a surge in demand.

Students by level of schooling

New schools (staged openings) and rebuilt schools

Schools

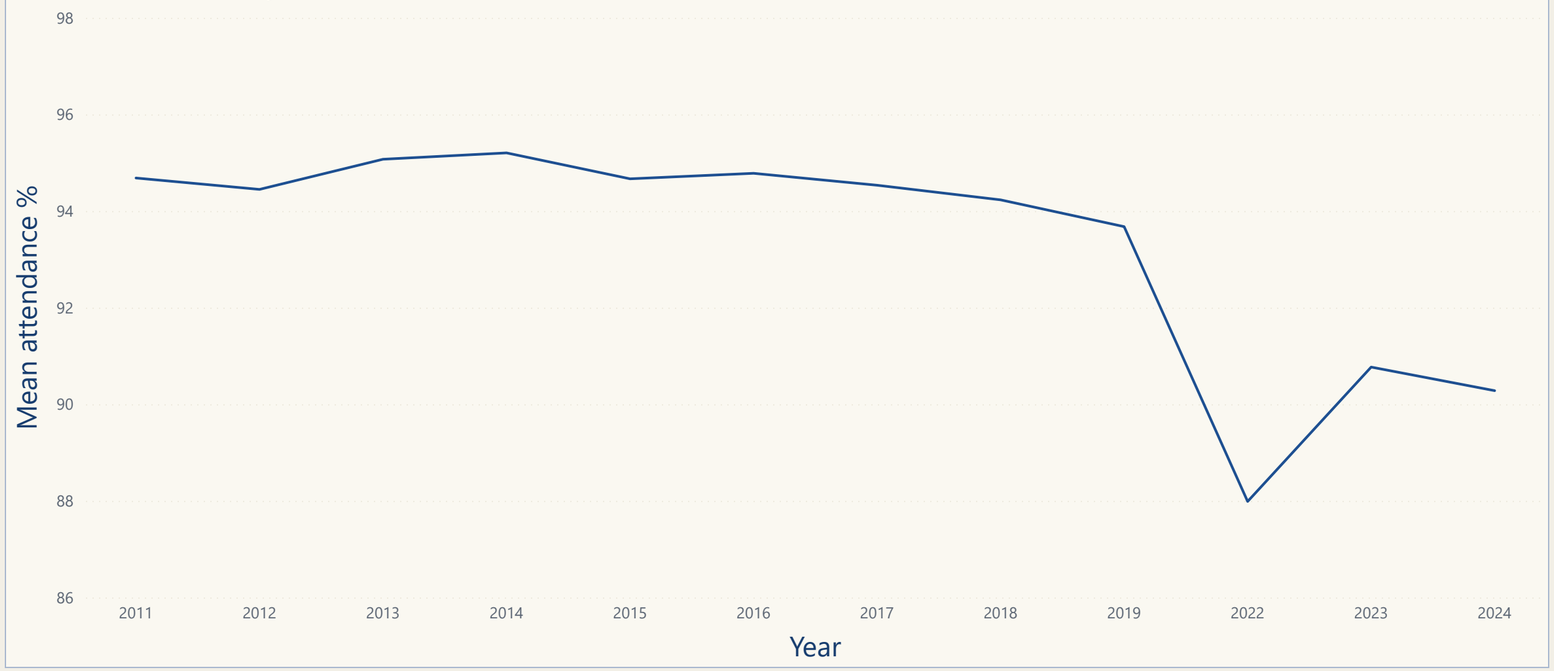

School	Students 2015	Students 2025	Growth since 2015	m² per student, 2025
